

Smoke Pro® Diagnostic Smoke Machines

The Smoke Pro® line of **EVAP APPROVED Diagnostic Smoke Machines** are the most advanced products available today.

All Smoke Pro® products feature a pre-set regulated output pressure of 13 Inches of Water (Less than ½ PSI) and simple one button control.

The industry leading **Total-Tech™** offers the professional technician the greatest ability to diagnose leaks of any size by incorporating a leak down function. This allows identification of leaks too small to be detected with the flowmeter (0.010" EVAP standard) and quick verification of a repair.

The sensitive flowmeter on the **Total-Tech™** and **Tech-Mate Plus™** provides a quick indication of a leak and confirms a repair. A 0.040" leak will read near the top of the meter while a 0.020" leak reads near the bottom.

The **Tech-Mate™** is a basic EVAP Approved diagnostic smoke machine for when you know you have a leak and want to fix it fast.

Save Time and Generate Profits

Few tools can save more time or produce more revenue. All Smoke Pro® diagnostic smoke machines quickly pin-point leaks in the entire system and bring your attention to problems you may not have considered. This ensures a complete repair and a satisfied customer.

Quickly Test and Repair All Systems

Smoke Pro® products are the essential tool for finding EVAP system leaks and many others:

- EVAP Systems
- EGR Valves
- Gaskets, Fittings & Hoses
- MAP/MAF Sensors
- Worn Throttle Shafts
- Brake Boosters
- Catalytic Converters
- Central Locking Systems
- Diaphragms & Seats
- Door & Window Seals
- Turbos & Intercoolers
- Oil Leaks
- Cracked or Broken Plastic Components
- Head & Tail Lamp Housings
- Cracked Manifolds.....And Many More!

Air-Safe™ Design - No Nitrogen

All Smoke Pro® products utilize an advanced design with computer control and do not use glow plugs. Smoke Pro® diagnostic smoke machines test EVAP systems with air similar to the method used by a vehicles' onboard Leak Detection Pump (LDP). It is not necessary to use expensive and bulky nitrogen systems when operating a Smoke Pro® product.

All Smoke Pro® products produce smoke using food grade or medicinal white mineral oil (common baby oil*) and do not require costly smoke solution changes.

Choose the best Smoke Pro® for your needs!
