

ACDelco Unicoil can maximize your hose sales and profits, while saving time for you and your customers.

It's practically curved/molded hose!

1. Slide Unicoil on the hose to where the bend is required. Position the Unicoil spine on the inside of the bend.

2. Press the spine until the required bend (maximum 90°) is achieved.

Now you can make those quick repairs when curved/molded hose isn't available. ACDelco Unicoil allows you to configure custom-bent hoses using straight heater hose - the perfect solution for:

- quick repairs,
- customized engines,
- out-of-stock situations and
- one-of-a-kind routing problems.

ACDelco Unicoil:

- Offers the convenience of immediately fitting most vehicle models, so fast and efficient repairs can be made, thereby increasing vehicle service turnover and boosting profits.
- Promotes customer service because worn hoses found during routine service can be replaced immediately on site, while saving the car owner from a potential vehicle breakdown.
- Increases service bay turnover by reducing the time needed for hose replacements.

Available for 1/2-inch (12.7mm), 5/8-inch (16mm) and 3/4-inch (19mm) ID hoses, ACDelco Unicoil is made of a stainless steel coil and a metal spine that will permanently hold its bend on curved/molded .
