

THE 3-WAY

Interior Clean Air System

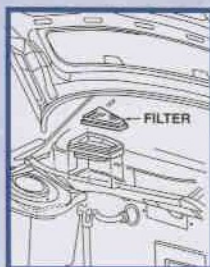

1 Incoming Air

Interior Ventilation Filters

Replace Every
12 Months or
12,000 Miles

All ATP interior ventilation filters feature activated carbon and a static charge to remove particles and annoying odors. In many applications, the original equipment filter removes particles only. *The ATP filter is a PREMIUM replacement.*

Much like a furnace filter, the ventilation filter cleans the incoming air during the heater, air conditioner and vent modes. Dust, pollen, mold spores and other particles will clog up the filter.

A clogged filter will reduce airflow into the passenger compartment. If not replaced, eventually the heater and evaporator (air conditioner) cores could be damaged by corrosion.

2 AC Evaporator Case

Clean 'N Coat®

CLEAN 'N COAT® is sprayed into the evaporator case to clean the cooling coil and then coat it. This coating repels water for up to 1 year. No moisture buildup — NO SMELL! No. AT-211 attacks the problem.

3 In Cabin

ZEO-TRAP™ by ATP-Inc.

"All Natural" ZEO-TRAP's negative ionic charge eliminates odors and moisture without a perfume or masking agent, is non-toxic, and can be recharged every 9-10 months. Simply place under car seat or in trunk and let ZEO-TRAP Kick Odors In The ASH!

ODOR AND MOISTURE CONTROL

- **The LAST ODOR ELIMINATOR YOU WILL EVER NEED!** Zeolite can be **regenerated** by placing the pouch in the sun. Every 9-10 months, place the pouch in direct sunlight for 8 hours.
- **Zeolite Eliminates** — smoking, food, diaper, sweat, pet, vinyl and plastic out-gassing (new car smell) odors.
- **No Perfume** — Zeolite is a mineral formed from micro porous volcanic ash. The negatively ionic charged zeolite attracts the positively charged odor particles. Zeolite ADSORBS (an electrical process) the odors. Zeolite also ABSORBS (a mechanical process) moisture. Zeolite **TRAPS** the odor molecules.
- **Zeolite is Non-Toxic** — will **not cause allergic reaction** or sensitivities to perfumes or chemical additives. Zeolite is EPA approved to be disposed with normal household waste. However, in some jurisdictions local rules may apply.
- **Place Under the Seat or in the Trunk** — wherever odors exist.

Zeo-Trap ATP Part No. ZE-1
Includes: One – 2 lb. Mesh Pouch

Zeo-Trap Counter Display
ATP Part No. A-508

Includes: One Counter Display,
Six – 2 lb. Mesh Pouches

Order ATP Part No. A-509
