

## Fuel Filter Replacement

### Pontiac Vibe and Wave, and Chevrolet Aveo Fuel Filter

On the Pontiac Vibe,

Pontiac Wave (Canada) and Chevrolet Aveo, the fuel filter is serviced as part of the fuel pump module, as described in the preceding paragraphs.

**TIP:** However, on these vehicles, if fuel pump module/fuel filter replacement is required, it is not necessary to remove the fuel tank. There is an access panel beneath the rear seat. When it's removed, the fuel pump module can be removed. Refer to SI for details.

Some customers have commented that they have been advised to replace their vehicle's fuel filter periodically.

On many vehicles, the fuel filter is non-serviceable (see table). The filter is an integral part of the fuel pump module and fuel pressure regulator assembly. The filter can be serviced only by replacement of the fuel module assembly. This process requires the removal of the fuel tank (one to two hours of labor, depending on the model), plus several hundred dollars in unnecessary parts.

The vehicle owner's manual outlines the periodic maintenance service required, under the Maintenance 1 and Maintenance 2 guidelines. Routine fuel filter replacement does not appear on either of these schedules.

In the future, due to the increased regulation of evaporative emissions, fuel systems utilizing a non-serviceable filter will become more common as new models are introduced.

- Thanks to David MacGillis

Vehicles with Non-Serviceable Fuel Filters	
<b>Chevrolet</b>	
2003-2008	Corvette
2004-2008	Malibu and MAXX, Silverado*, Tahoe**, Suburban, Avalanche
2005-2008	Uplander
2007-2008	Aveo Notchback (No serviceable filter)
2004-2006	Aveo Notchback***
2004-2008	Aveo 5-Door***
2005-2008	Cobalt <sup>\$</sup>
