Kit Captures and Retains A/C System Damaging Debris, Without Diminishing System Performance

ACDelco is pleased to introduce the availability of a new universal mobile A/C high-pressure side, in-line filter kit; p/n 15-21184.

The kit is a low-cost and unique method to assure A/C system filtering reliability. This single kit services three line sizes (5/16", 3/8", and 1/2" OD) as well as incorporating any size orifice tube if required.

The design offers enhanced installation features, performance reliability, and the ability to capture and retain A/C system damaging debris, without a diminution of system performance.
